

Materials

WOODS

MOMA DESIGN pays great attention to the choice of the best materials for the realization of its furniture lines. The quality of the raw materials used is a key component to get the highest technical, aesthetic and functional level. Each collection is characterized by the choice of *FSC (Forest Stewardship Council)* certified source materials, technical standard product that has the goal of promoting worldwide the proper management of forests and forest products.

MDF

The *Medium Density Fibreboard* comes in the form of panels which arise from chips of selected woods, subjected to washing and then defibrated by special metal discs. The fibers are mixed with resins and undergo a prior pressure in order to remove the air before the final pressing. The heat produced during this operation activates the resin that joins the fibers.

WOOD VENEERS

Our veneers come from woods that are selected directly on the production sites: oak, ebony, wenge and rosewood and walnut are our natural wood choice for the creation of our contemporary furniture; the tradition of wood blends with the high level of design.

MELAMINE PARTICLE BOARD

These wood-based panels are composed internally of wood particles, mainly fir-wood and plywood, and resins with low content of formaldehyde. External faces are covered with high-thickness decor papers or polymeric layers, with three-di-mensional relief finish. MOMA Design uses this material for the internal parts of drawers.

LACQUERINGS

Our lacquerings are realized with a wide range of colors using only certified paints without heavy metals. *NCS* is the professional color system used in most of furniture sectors and encodes the color of the painted parts by giving the products an added value, so that the designer can match different products and materials with great ease and effectiveness in the results, realizing counterchange or tone-on-tone matches.

3D FLUTED WOOD PANELS

These uniquely designed and animated panels are applied to our MDF to achieve timelessly designed fronts.

OTHER MATERIALS

NATURAL STONE

We select the best varieties of natural stone choosing blocks from Italy and from the rest of the world, for instance Cosmic Black, an elegant granite from Brazil, black with peculiar white veins enriched by a touch of red and yellow or White Marble Carrara Extra, also known as Carrara Marble C, the best quality on the market.

PORCELAIN STONEWARE

MOMA Design uses stoneware produced in Italy by Italgraniti Group, in factories certified with quality system ISO14001, using selected raw materials originating in quarries from all over the world, through the blending of mixtures with different types of minerals during pressing, in order to obtain a product aesthetically similar to natural stones and marbles, but with higher technical features.
